INTRODUCTION

Jonathan B. Martin, Carol M. Wicks, John E. Mylroie 1

FLOW IN KARST: DIFFUSE AND CONDUIT 4

Conduit morphology and hydrodynamics of the Floridan aquifer:

Moving to the next level—conduit modeling

William L. Wilson 5

Ground water flow in karst: Matrix flow and conduit flow with implications for the Floridan aquifer

William B. White 9

Facies control on matrix permeability in the upper Floridan aquifer, west-central Florida:

Implications to diffuse flow

David A. Budd and H. L. Vacher 14

New views of the karstic porosity system within Pleistocene high-frequency carbonate cycles of the Biscayne aquifer, southeastern Florida

Kevin J. Cunningham, Janine Carlson, Neil F. Hurley, and G. Lynn Wingard 25

New approaches in modeling and characterization of karst aquifers (abstract)

Steffen Birk, Rudolf Liedl, and Martin Sauter 27

Karstic functioning in chalk aquifer: The example of Lys springs (France)

Abdelkabar Maqsood 32

Interaction of fracture and conduit flow in the evolution of karst aquifers

Douchko Romanov, Wolfgang Dreybrodt, and Franci Gabrovsek 38

Surface water control of gradients in the Floridan aquifer: Observations from the Santa Fe River Sink-Rise system

Lauren A. Smith, Jonathan B. Martin, and Elizabeth J. Sreaton 44

Sinkhole activity in Florida: Causes, occurrences, and solutions

A. F. Randazzo, D. L. Smith, K. H. Commins, and B. Dodek 49

SPECIATION: ENERGETICS AND BARRIERS 52

The Florida karst and its unique subterranean fauna

Richard Franz 51

Florida and Caribbean karsts:

An overview of diversity and origins of the obligate invertebrate cave faunas

Stewart B. Peck 53

Patterns of species richness in the Florida stygobitic fauna

David C. Culver and Horton H. Hobbs III 60

Biodiversity associated with anoxic, sulfidic environments in west central Florida cave systems

K. Michael Garman 64

Energy budgets in restricted environments: Islands, caves, benthos, and burrows

Brian K. McNab 66

GEOCHEMISTRY: AGE, RESIDENCE TIME, AND DEEP INPUT 68

Geochemical and isotopic studies of paleowaters and recent recharge in parts of the Floridan aquifer system of Florida and Georgia

L. Niel Plummer 69

Hydrogeochemistry of a karst escarpment

Sam B. Upchurch 73

Using spring-water chemistry to assess groundwater contamination and ages of shallow and deep ground water flow systems	
<i>Brian G. Katz, J. K. Böhlke, and David Hornsby</i>	76
Hydrochemical processes and cave development, Caribbean coast, Yucatan peninsula, Mexico	
<i>Peter L. Smart Patricia Beddows, Stefan Doerr, Samantha Smith, and Fiona F. Whitaker</i>	79
MICROBIOLOGY: REDUCED AND OXIDIZED SYSTEMS	84
Microbes and energy acquisition in subterranean habitats	
<i>Aaron L. Mills</i>	85
Microbial mediation of dissolved sulfide oxidation and its role in speleogenesis	
<i>Janet S. Herman, and David A. Hubbard, Jr.</i>	87
Subaqueous and subaerial speleogenesis in a sulfidic cave	
<i>Libby Stern, Annette Summers Engel, Philip C. Bennett, and Megan L. Porter</i>	89
Distribution and sources of heterotrophic bacteria in wells, caves and springs of a karst aquifer in the midwestern U.S.	
<i>Samuel V. Panno, Keith C. Hackley, Hue-Hwa Hwang, and W. R. Kelly</i>	92
ISLANDS: CONSTRAINTS IN TIME AND SPACE	96
A solution template for atoll and barrier reef morphology	
<i>Edward G. Purdy</i>	97
A solution template for atoll and barrier reef morphology conservation of anchialine cave biodiversity	
<i>Thomas M. Iliffe</i>	99
Biogeochemical processes that influence cave development within Bahamian carbonate platforms	
<i>Stephanie Schwabe</i>	103
Karst flow systems in young carbonate islands	
<i>John E. Mylroie and John W. Jenson</i>	107
A conceptual model for groundwater flow in the carbonate aquifers of the north coast of Puerto Rico in the vicinity of the Rio Grande de Manati	
<i>Ralph O. Ewers.</i>	111
Geology and hydrogeology of a karst limestone aquifer system on the north coast of Puerto Rico	
<i>Robert A. Renken, William C. Ward, Jesús Rodríguez-Martínez, and Fernando Gómez-Gómez</i>	113
Does hydrogeology control the geomorphology of the north coast of Puerto Rico?	
<i>Ira D. Sasowsky</i>	115
YUCATAN: FLORIDA EXPOSED	116
Groundwater flow and chemical interactions between ground water, limestone, and the atmosphere in an unconfined, coastal Yucatan aquifer	
<i>Ronald K. Stoessell</i>	117
A fresh-salt water mixing mechanism in a coastal aquifer, Quintana Roo, Mexico	
<i>Kris Esterson</i>	123
Hydrology, geochemistry and diagenetic potential of saline groundwaters:	
Field results from the Bahamas and model studies	
<i>Fiona F. Whitaker, Gareth D. Jones, Ward E. Sanford, Peter L. Smart, Alicia M. Wilson</i>	124
Density stratified groundwater circulation on the Caribbean coast of the Yucatan Peninsula, Mexico	
<i>P. A. Beddows, P. L. Smart, F. F. Whitaker, and S. L. Smith</i>	129
The geochemistry and geomicrobiology of saline groundwaters: Yucatán Peninsula, Mexico	
<i>Samantha L. Smith, Fiona F. Whitaker, R. John Parkes, Peter L. Smart, Patricia A. Beddows, and Simon H. Bottrell</i>	135
Preliminary analysis of the ecology of a cenote in Quintana Roo, Mexico, characterized by its extraordinary quantities of remipedes	
<i>Jill Yager and Michael E. Madden</i>	138

Understanding Zacatón: Exploration and initial interpretation of the worlds deepest known phreatic sinkhole and related karst features southern Tamaulipas, Mexico <i>Marcus Gary</i>	141
The Chicxulub impact crater and the regional hydrogeology of northwest Yucatan <i>Luis E. Marín and Javier Alcocer</i>	146
EDWARDS: IN TRANSITION	152
The Edwards aquifer: Water, policy, and science in transition <i>Robert E. Mace and Todd H. Votteler</i>	153
Genetic relatedness of aquifer organisms as a tool for determining aquifer connectedness <i>Jean Krejca</i>	157
Evidence of discrete flow in the Barton springs segment of the Edwards aquifer <i>Nico M. Hauwert, David A. Johns, John Sharp</i>	162
Hydrogeologic characterization and potentiometric surface mapping using ArcView (GIS) Comal and Kendall Counties, Texas <i>Kristin Miller</i>	168
What goes in must come out: Temporal variations in concentrations of soluble pesticides discharging from the Barton springs system, Edwards aquifer, Texas <i>Barbara J. Mahler</i>	169
Techniques for investigating the extent of karstification in the Edwards aquifer, Texas <i>Stephen R.H. Worthington, Geary M. Schindel, and E. Calvin Alexander, Jr</i>	173
THE PALEOZOIC: HOW DOES IT DIFFER?	176
Eye Degeneration and Restoration in Astyanax Cavefish <i>William R. Jeffery</i>	177
Pink planaria: fascinating flatworm, endangered endemic <i>Douglas B. Noltie and Carol M. Wicks</i>	180
Variations in the discharge and specific conductance of the spring water in which stygobitic species live <i>Carol M. Wicks and Douglas B. Noltie</i>	183
Karst in paleozoic rocks: How does it differ from Florida? <i>Arthur N. Palmer</i>	185
Detection of Iapetan rifting (Rome trough tectonism) by Quaternary karstification: Pulaski County, Kentucky <i>Lee J. Florea</i>	192
FIELD TRIP GUIDE: A brief introduction to the geology, hydrogeology and natural history of north central Florida <i>Jonathan B. Martin and Roger W. Portell</i>	205
AUTHOR INDEX	212
